EAE Feb 2012, 2012. Taschenbuch. Book Condition: Neu. 220x150x4 mm. This item is printed on demand - Print on Demand Neuware - La diabetes mellitus es un padecimiento de salud pública mundial y día con día aumenta la población que lo padece. El desarrollo de dicha enfermedad está relacionado estrechamente con los estilos de vida de la población. La diabetes mellitus tipo 2 es una de las enfermedades crónico degenerativas que más afectan a nuestro país, la Organización Mundial de la Salud reporta que cada año mueren 3.2 millones de adultos entre 35 64 años, su prevalencia en los países en desarrollo aumentara al doble en los próximos 30 años debido a que la diabetes es una enfermedad silenciosa y la mayoría de las personas no saben que lo padecen solo hasta cuando presentan alguna complicación de la misma. Por lo antes expuesto el objetivo del presente es identificar los principales estilos de vida que ponen en riesgo la integridad y calidad de vida de los pacientes que padecen dicha enfermedad y hacer conciencia en población aparentemente sana de las repercusiones que ocasiona este problema de salud pública y sugerir estrategias para su prevención 64 pp. Spanisch.
