### ***Reviews***

*A high quality pdf as well as the typeface applied was exciting to see. It really is written in simple words and phrases rather than difficult to understand. You will not really feel monotony at any time of your time (that's what catalogs are for relating to in the event you question me).*

Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Free Solar-Powered Cars - How to Win, Win, Win means that when you go with a Solar-Powered car, you win, the country wins and the planet wins. - For More Info. Because the cost of solar energy electric generation has come down in price, today anyone can afford one on their roof. Not only that but the entire system is free if your electric bills are higher than around \$75 Per Month - what the vast majority of us are paying currently especially if we own a larger home and/or have a family. What's even better is that the cost of electric vehicles has also come down in price so that they compete easily with the gas-guzzlers of yester-year technology. No more huge repair costs to maintain a gas-guzzler, and the government rebates, once again make the cost of owning a solar-powered car more than affordable and in fact, if you are in the market for a new car today and you stubbornly choose a gas-guzzler, you are making one of the worst economic decisions in your life. Why would anyone want to continue to pay for gasoline that is constantly going up in price and is also poisoning our planet when you could just as easily own an electric vehicle where there is no cost to drive it - NONE - and you are helping to reverse the worst climate disaster in history and thereby helping to save our planet? We prove to the readers of this book in undeniable facts that running around in a solar-powered car is now a huge benefit and it saves the average homeowner at least \$500 to \$1,000 per month....
